

VIRTUAL MEETINGS AND CONFERENCES

We want you to be able to continue organising meetings and conferences that stimulate and encourage learning, networking and collaboration, in spite of the current challenges we all face. To do this we have teamed up with, Venue Audio Visual, who are responsible for all the AV provision at the Wellcome Genome Campus Conference Centre, as well as other prestigious venues across Cambridge.

OUR OFFER

The most unique feature of our service is that all the technical aspects of getting your event online are managed by professional AV technicians, meaning your event's presentation will be of excellent quality and managed by us. The package has also been designed specifically with our clients' needs in mind.

OUTLINE OF THE TECHNICAL SERVICE

- Creation of a secure, branded conference mini site (or portal), home to all the event information and content. Homepage uses Conference Centre images as standard, but can be bespoke at additional cost.
- Liaison with your invited speakers to arrange and guide the remote recording of the talk via their computer by a technician. This includes optimising their video and audio, and the incorporation of their slides.
- Speakers recorded presentations edited into the order of the client's programme, with videos presented in easy-to-navigate titled sessions. Each session/recording has chapter markers, allowing viewers to navigate easily to a particular speaker in a session.
- Help setting up Spatial Chat, a new platform for networking and exhibitor sessions.

Other features:

- Live Q&A chat with option of live polling
- Poster area comprising high-res posters and video posters, with the option of Q&As with poster authors
- Speaker bio section
- Optional sponsor banners on all pages
- Integration with Eventbrite
- Analytics

If you are considering holding an online event, please get in touch. We can arrange a virtual walk around of an online conference, arrange a video call to discuss your requirements more fully, and provide you with a quote.
